

## Aerial Work Platform

Aerial Work Platforms - There are lots of attachments for forklifts that can be utilized so as to help expand the capabilities of your forklift and allow you to lift items, handle materials with less effort or to accomplish clean-up tasks.

Lots of the accessories are specifically designed to fit on the blades themselves. Blade extensions for example, are utilized if you require more fork length, which increases lifting capacity. Fork extensions come in lengths ranging from 48-120 inches. Triangular or rounded attachments are one more type utilized whenever moving rolled material in order to make sure it does not roll off of the standard flat blades.

Lifting accessories could be pivoting and telescoping crane attachments. They are available in many styles. These accessories are usually meant for moving metal bars, poles, lumber or any sort of bulky things. Additional accessories like for instance different kinds of hooks and hook plates are presented so as to pick up things utilizing a chain or sling. Slab lifters and magnetic lifters are other items which can be utilized with hook attachments. Slab lifters are specialized accessories that are designed for picking up various materials which are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools which attach to your lift truck so as to make moving rolls of carpet much easier. The attachment connects onto the lift truck's forks and has a pole that goes through the center of the carpet roll.

There are several various kinds of forklift accessories which could be intended for facility maintenance like for example snow blades. These forks attach to front end loaders and can move materials like for instance dirt, soil and snow. Other popular cleanup accessories include magnetic sweepers and standard sweepers. Standard sweepers comprise a broom which the lift truck forks hook onto for sweeping large spaces like for instance warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in places where there is lots of metal fragments like on shop floors for instance. Sweepers have widths up to 60 inches and this surface area makes clean up quick and effortless.

A material spreader is another lift truck attachment that is often used at facilities. These spreaders are useful for a range of applications like spreading ice melt, rock salt, pellets, seeds, fertilizers, insecticides and seed.

Another optional lifting accessory are work platforms. These can be utilized by numerous various companies on a daily basis. Platforms may vary in size from 36" x 36" to up to 60" x 60". A few units may be accessible and are capable of folding up and storing into a smaller place. Work platforms are designed to raise employees up to an overhead location making use of the lift truck. Larger platform models have added space for employees so as to bring tools and other essential stuff meant for the job. Often work platforms are made of poly material or steel.
